

MCSHS IT Guide – Mac OS X: EQNET Auto Proxy Discovery

Problem / Question

My Mac connects to EQNET, but can't / unable to access the internet?

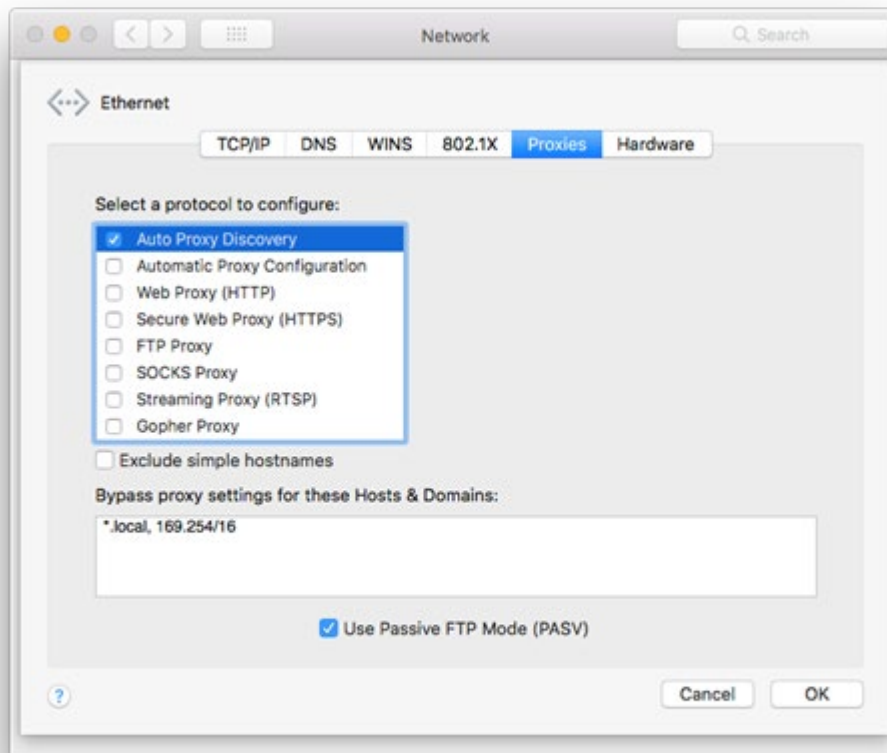

I can get to Moodle, but I can't / unable to get to any other sites?

I am unable to browse internet using Safari?

Solution

Check your proxy settings:

- Go to **Apple > System Preferences > Network**
- Click on the **Advanced** button, then the **Proxies** tab
- Under 'Select a protocol to configure' the '**Auto proxy discovery**' box should be ticked

- Click **OK** then **Apply**
- Test your internet browsers (Safari, Google Chrome, etc.) and enter your EQ username (school login) and password.
